

Membership Charter

By joining the CO₂ Value Europe Association, the members:

- Recognise that anthropogenic global warming is a reality and that CO₂ emissions mitigation is one of the largest and most serious challenges facing the world.
- Are committed to pushing forward measures and actions related to CCU technologies that contribute to the transition towards a low-carbon emission society as agreed in the COP21 Paris objectives.
- Will collectively define and implement a strategic roadmap for CCU aimed at reducing net global CO₂ emissions to the maximum extent possible within realistic industrial constraints.
- Will develop and promote sustainable CCU solutions that effectively contribute to a net reduction of global CO₂ emissions, based on accepted LCA (Life Cycle Analysis) standards.
